

FACULTY ONBOARDING FOR NEW ACADEMIC AND CLINICAL INVESTIGATORS AT THE UVA SCHOOL OF MEDICINE

This document is intended for Research Faculty of any rank who are new to the UVA School of Medicine. It has important information and links related to Lab Relocation, Employee Onboarding and Faculty Resources.

LAB RELOCATION

This page contains information for new faculty who are moving an established laboratory from another institution. These tips will help smooth the way for relocating lab personnel and equipment.

Relocating Lab Personnel

During the recruitment process, ideally 4-6 months prior to the move, here are some ways to make the process easier for your lab personnel.

Relocating General Lab Personnel

- ☐ Discuss the move with lab members and decide who is moving and who is not.
- ☐ Determine how to pay for those who are not moving but will remain as members of your lab.
- ☐ Assist those who are going to different labs.
- ☐ Encourage the lab personnel to visit Charlottesville, explore daycare and schools, and look for housing.
- ☐ Contact your UVA department administrator on behalf of staff and postdoc lab members to initiate job requisitions, visas, and offer letters.
- ☐ Note that lease and mortgage processes often require employment verification.
- ☐ Consider offering a moving bonus and/or covering moving costs.
- ☐ More information is available on the [UVA HR website](#).

Relocating Graduate Students

- ☐ During the interview process, let the department chair know that you have graduate students in your lab who may relocate with you.
- ☐ To relocate students into the Biomedical Sciences (BIMS) program and/or to have UVA BIMS graduate students in your lab, you will need to have an affiliation with a PhD degree-granting program. Contact the Associate Dean for Graduate and Medical Scientist Programs as soon as possible to discuss (Janet V. Cross, jvc5b@virginia.edu. 434-243-9401). Depending on the program(s) with which you would like to affiliate, you may need to request a courtesy appointment in a department.
- ☐ Depending on your relocating student's stage in their graduate program, two options will exist:
 - A student may transfer into a degree-granting program at UVA to complete their studies (generally most appropriate for students who are relatively early in their studies).
 - A student may remain administratively housed at the prior institution while completing their research at UVA. In this case, the student would still need official status at UVA, which is achieved through the Visiting Graduate Researcher program administered by the Provost's Office under the following policy: <https://uvapolicy.virginia.edu/policy/PROV-032>
- ☐ The Associate Dean will be able to help you navigate the process for determining which path makes the most sense for your trainees, as well as to help you secure an affiliation with a degree-granting program for your current and/or future graduate students.

Relocating Lab Equipment, Animals, and Materials

Ideally 3-5 months prior to the move, these tips should help facilitate moving the physical lab.

Logistics of Managing the Move

- ☐ Schedule the date as soon as you know you are moving. Summer is normally the busiest time of the year.
- ☐ Contact at least three moving companies specializing in lab relocations. Lab relocation companies. [List of approved vendors](#).
- ☐ Gather detailed quotes based on specific lab requirements (e.g., type and quantity of centrifuges, freezers, fridges, chemicals, reagents, furniture). The moving company may request video calls, pictures, and/or on-site visits to provide estimates. Note that you will need to provide power requirements for freezers prior to arrival.
- ☐ Inquire whether a project manager will oversee the move (plan for additional cost).
- ☐ Verify insurance and liability coverage is provided; understand the liability terms in case of damage or loss.
- ☐ Ask if the moving company can arrange for trucks with electrical outlets to transport fridges and freezers with temperature sensitive contents.
- ☐ Inquire about loaner freezers/fridges if needed.
- ☐ Compare quotes based on cost, services offered, and timelines. Submit to your UVA department administrator for approval.
- ☐ Determine a specific moving date.
- ☐ For more information on shipping dangerous goods and biological material training, visit the [Environmental Health and Safety](#) website.

Preparing to Move the Lab

- ☐ Coordinate with facilities management at both sites to provide access to the loading docks and any special requirements on moving day.
- ☐ Supply the moving company with contact information for the building managers at both sites, as well as a lab manager.
- ☐ Take measurements of the lab space to determine placement of lab equipment (e.g. incubators, centrifuges, fridges, freezers, microscopes) for the moving company.
- ☐ Prepare a detailed inventory of all lab equipment, computers and supplies. Pictures and lists are recommended.
- ☐ Label all equipment and boxes clearly for easier unpacking.
- ☐ Hoods, cabinets, or other equipment must be decontaminated and certified as “clean” by the appropriate institutional representatives (environmental health and safety or biosafety personnel).
- ☐ If fridges and freezers can be moved without being emptied, ensure contents are packed tightly so items do not shift during transport.
- ☐ Liquid nitrogen tanks should be filled to a level sufficient for a two-day trip.
- ☐ Ensure hallways and loading elevators are clear for the movers.
- ☐ Work with your UVA department administrator to connect with the appropriate UVA personnel for space planning, renovations, IT equipment migration and integration.

- ❑ Work with UVA SOM-IT for lab integration to include computer set-up, system reimaging and configuration, network connectivity, data migration and storage solutions, lab instrumentation connectivity and interface solutions. Please reach out and contact UVA SOM IT Director, Jeff Schroeder at gck8mr@virginia.edu for assistance.

Managing Transfer Agreements

The transfer process can take six or more months to complete. With the help of your department administrator, begin the process as early as possible, especially if there are human or animal subjects. Contact information for UVA SOM departments is available [here](#).

General Transfer Information

- ❑ Consult with both institutions' contracting/technology transfer offices about legal agreements required for the transfer of lab materials, equipment, samples, animals, data, etc.
- ❑ Contact your previous institution's research contracting/technology transfer office to determine the requirements for outgoing transfers.
- ❑ Review information on the [SOM Office for Research](#) website on material transfer agreements and work with your department administrator to determine the requirements for incoming transfers. All transfer agreement requests should be submitted before the lab moving date.
- ❑ Animals, plasmids, cell lines, data, etc., require separate agreements. In many cases, UVA may need to enter into agreements with multiple parties to facilitate transfer of materials/data.
- ❑ The Provider and Recipient Scientist on most contractual agreements cannot be the same person. Please name a Provider Scientist at your previous institution for the outgoing transfer. You will be the Recipient Scientist for the agreement at UVA.
- ❑ Contact [UVA's Center for Comparative Medicine](#) to tour the vivarium facility and ensure there is enough space for future growth.
- ❑ More information is available at [UVA Contracts – Lab Transfers](#).

Grant Transfers

- ❑ Inform your current department administrator and central sponsored projects office about your intended grant transfer to determine a date of relinquishment.
- ❑ Work with your UVA department administrator and the [SOM Office of Grants and Contracts](#) to determine the requirements for incoming grant transfers and to initiate transfer requests.
- ❑ Ensure no break in service/leadership for grant awards by making your UVA employment start date at UVA the day immediately following the end date at your current institution.
- ❑ Contact the sponsor's grants management team to request specific transfer instructions or guidelines.
- ❑ Estimate relinquishing balances and/or prepare to cease incidental spending in enough time to facilitate reporting and transfer after the employment end date.
- ❑ Ensure all purchase orders are closed, and invoices are paid.

- ☐ Ensure all outgoing subawards are amended for the new grant end date.

NIH Transfers

[SOM Office of Grants and Contracts](#) or your department administrator should reach out to the NIH grants management specialist for guidance about:

- ☐ Specific documents/information to include in the transfer application
- ☐ Budgeting instructions
- ☐ A deadline for submission of the transfer application
- ☐ The PI should provide a copy of the original Notice of Award and grant application from the prior institution
- ☐ Ensure that the previous institution submits a relinquishing statement in Commons using UVA's UEI (JJG6HU8PA4S5) and SOM contact email (uva_som_ogc@virginia.edu)
- ☐ Sub-sites, whether new or existing, must complete UVA's consortium commitment form and provide a detailed budget, justification, SOW, rate agreement, regulatory approvals, and other documents as required for the transfer application
- ☐ Once the transfer application is submitted and the funding proposal is in "Pending Sponsor Review" status, your department administrator may request an advance/at-risk account to begin preliminary spending
- ☐ Pre-award costs cannot pre-date the PI's appointment at UVA
- ☐ Review SOM [transfer information](#) and UVA's [NIH Transfer Application Checklist](#)

Protocols

Animal Protocols

- ☐ Protocol Preparation and Submission
 - Arrange meetings with the [Institutional Animal Care and Use Committee Center for Comparative Medicine](#).
 - Request access to the protocol submission system.
 - For initial transfer of rodent colonies, it is advised to write a simple protocol with breeding and genotyping only. If needed, IACUC staff will review the draft protocol and advise of necessary changes before submission.
 - After the animal protocol is submitted, each animal handler will receive notification about required trainings.
 - Contact [WorkMed](#) as animal handlers require additional safety screenings. See "Onboarding Tasks after Arrival."
- ☐ Animal Transfers
 - Coordinate the move between institutions, like standard animal shipping.
 - Contact UVA Center for Comparative Medicine to arrange receipt of animals ([CCM@virginia.edu](#)).
 - Submit all required health reports to UVA Center for Comparative Medicine prior to shipping.
 - Transfer during summer months can pose challenges due to temperature fluctuations. Proper planning ensures safe transit.

- UVA does NOT accept rodents that are positive for Mouse Parvoviruses (MPV).
- Quarantine Procedures
 - Quarantine is required for all animals originating from sources other than approved commercial rodent vendors (Jackson, Charles River, Taconic, Envigo) or approved rodent repositories (Jackson, University of Missouri, etc.). The quarantine period is 3-4 weeks for full testing unless any health issues are identified. The animals will be housed in UVA Center for Comparative Medicine's Rodent Quarantine Facility in the Aurbach Animal facility. Upon their arrival, you will be notified by email. If animals are to be used acutely upon arrival, please coordinate this during the import process before animals arrive at UVA.
- License for Controlled Substances
 - Researchers must have a valid registration to procure and use controlled substances in research involving animal models or in vitro experiments at UVA.
 - To begin the application process, contact the [Director of the Office of Animal Welfare](#).
 - Ensure the designated location for controlled substances has a lock for security purposes.

Biosafety Protocols

- Contact the [UVA Institutional Biosafety Committee](#) coordinator to request assistance with the protocol application process.
- The protocol must be submitted for review two weeks prior to the monthly IBC meeting date.
- Complete the [Inventory and Activity Registration](#)
- After lab setup is complete, arrange a pre-inspection walk-through with the IBC Coordinator as soon as possible. EHS staff will help identify areas that need attention in preparation for the final inspection, following a checklist. Typical inspection clearance requires at least 3-4 weeks.
- Ensure all lab members complete the mandatory lab safety training modules.
- Request assistance from the [UVA Facilities Management Automation Services](#) team which installs, maintains and optimizes building automation system controls such as freezer and fridge temperature monitoring and alarm system set up.
- Complete compliance training
 - CITI
 - COI Disclosure
 - Exposure
 - BSL Training
 - UFI Training
- Learn about [UVA Research Core Facilities](#) to make your research more efficient and cost effective with specialized instrumentation and personnel.
- Learn about [iLab](#), an integrated, web-based management system that facilitates the administration of research cores and shared resources. It simplifies the process of booking equipment, requesting services, managing billing, and tracking usage.

Human Subjects Protocols

- ☐ Determine which IRB will review your research: [UVA Health Sciences Research IRB](#) or [UVA Social and Behavioral Sciences IRB](#).
- ☐ Contact your department Clinical Research Coordinator for assistance with preparing your IRB protocols.
- ☐ Complete the required training for researchers working with human subjects via the [CITI Program](#):
 - [Good Clinical Practice](#)
 - IRB-HSR [Researcher Basic Course](#). Note that new employees are required to complete the full basic course and not the refresher course regardless of training obtained from other institutions.

EMPLOYEE ONBOARDING

This section contains information related to computing access and purchasing for you and personnel in your lab.

Computing Access

After signing the offer letter, work with your department administrator to get your UVA Computing ID and activate your account (this includes all lab members/staff transferring to UVA).

- ☐ Follow the step-by-step instructions provided by UVA Information Technology Services to set up your [UVA email account](#). Ensure your email is configured on all devices. Set up DUO Mobile authentication.
- ☐ Set up your email signature following [UVA's guidelines](#), which include your name, title, department, and contact information.
- ☐ School of Medicine faculty and staff have both an academic email address (@virginia.edu) and a UVA Health System email address (@uvahealth.org). UVA policy requires that Protected Health Information, HIPAA, and Human Subject Data can only be relayed/exchanged via UVA Health System (uvahealth.org) accounts in most cases. Ask your department administrator about the preferred email address for your department/role.
- ☐ If needed, set up email forwarding from your previous institution to ensure a smooth transition.
- ☐ After you have your Computing ID, you can access and sign up for [UVA Listservs](#).
- ☐ Get an account and access training for [LabArchives](#) to protect and manage research data at UVA, and help comply with funding requirements for government agencies.
- ☐ Your UVA Computer ID account comes with the M365 suite of tools (Outlook, Word, Excel, PowerPoint, OneDrive, etc.) Your @virignia.edu email account has a storage limit of 1TB and your OneDrive has a storage limit of 5TB.
- ☐ Sign up for a [UVA Box](#) account to store up to 1 TB of non-sensitive/moderately sensitive files securely on any device.
- ☐ Depending on what data, site or application you need to access, a VPN may be required. There are two VPNs at UVA, one is for the academic network, and the other is for the health system network. The Academic Network VPN is called the High Security VPN or HVPN. Additional instructions can be found at: [High Security VPN - UVA ITS](#). The UVA Health VPN is called BigEdgeIP VPN, it first requires a UVAHealth account and then that a request be sent to [AMP: Login](#). Please contact School of Medicine - Information Technology (SOM-IT) Office for assistance 434-923-5334.

Purchasing

- ☐ To procure any IT equipment (PCs, Macs, laptops, printers, software, servers, storage, etc.) prior to or after arrival at UVA, please consult with SOM-IT to assist. Point of contact is Jeff Schroeder: gck8mr@virginia.edu.
- ☐ [MolMart](#) provides on-site reagents and supplies at contract prices without shipping or eVA costs.
- ☐ What are work tags and how do I access my funding?
- ☐ Understanding budgets, tracking spending

- ☐ Orders are placed through [Workday](#). Ask for the “New PI” discounts. Bulk order when possible; ask for quotes from company representatives.
- ☐ Workday Delegate Assignments (reimbursements)
- ☐ Check with your department administrator to see if you’re eligible to apply for a [purchasing card](#) as departments vary on who can have a card.
- ☐ Information on [booking travel](#) for work-related and work-sponsored travel at UVA
- ☐ Find out about a discounted license for [BioRender](#) software that helps create and share professional scientific figures.

After Arrival at UVA

Review HR onboarding instructions you received via Workday for important information, including:

- ☐ Obtaining your ID badge
- ☐ Work with your HR recruiter to make an appointment for all required pre-employment health screenings.
- ☐ Various training modules and the I9 onboarding procedures will be assigned to you after your official start date.
- ☐ Hiring new lab personnel
- ☐ Health System account access
- ☐ Guidelines for securing, storing, and sharing research data
- ☐ Gaining Access via VPNs and Badge information [this is already listed under Computing Access above]
- ☐ If you are interested in training PhD students in your lab, contact the Associate Dean for Graduate and Medical Scientist Programs to discuss how to secure an affiliation with a PhD degree-granting program and become a BIMS approved mentor. (Janet V. Cross, jvc5b@virginia.edu. 434-243-9401).

FACULTY RESOURCES

- ❑ The School of Medicine [Office of Faculty Affairs and Faculty Development](#), along with the UVA [Center for Faculty Wellbeing and Development](#) support you throughout your career. Below are some of the programs that will help you thrive personally and professionally.
- ❑ [Committee on Women in Medicine & Science](#) promotes and enables the representation, development, and contributions of all individuals.
- ❑ [Promotion & Tenure](#) for both regular cycle actions and expedited reviews for retention purposes.
- ❑ [Early-Career Faculty Mentoring Program](#) supports junior faculty and their mentors in building meaningful mentoring relationships.
- ❑ [Junior Faculty Development Program](#) a cohort-based program spanning an academic year which provides a solid foundation for professional development and career success in academic medicine.
- ❑ [Center for Excellence in Education](#) carries out its mission through committees which collectively address key strategic pillars of faculty development, scholarship, excellence, innovation, and community.
- ❑ [Claude Moore Health Sciences Library](#) offers data analysis, literature searches, publishing help, and professional development for researchers.
- ❑ New Faculty Orientations are offered through both the School of Medicine and the Office of the Provost.
- ❑ Faculty Writing Support is provided by the Office of Faculty Development as well as the Office of the Provost.
- ❑ National Center for Faculty Development and Diversity membership is available to graduate students, post-docs, and faculty at no cost.
- ❑ [Leadership Development/Coaching](#) UVA provides a range of opportunities to support and teach faculty about best practices in inclusive, effective leadership so that they might best achieve their goals and serve the people and missions in their charge.
- ❑ [Leadership in Academic Matters](#) is a faculty development opportunity focused on supporting, inspiring, and rewarding those who have demonstrated leadership characteristics and future potential.
- ❑ [ACC Academic Leaders Network](#) is a year-long leadership development program with faculty participants from all the Atlantic Coast Conference universities.
